

INTER-OFFICE COMMUNICATION

TO: Dr. Whitman, Director, Ohio EPA DATE March 4, 1974
FROM: Don Day, Assistant Chief, Division of Waste Mgmt. & Engineering
SUBJECT: News media coverage on disposal of solid waste from several
Franklin County communities in Marble Cliff Quarries

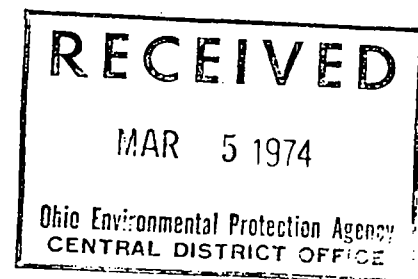

Marble Cliff Quarries property is the site of a licensed landfill that has been receiving solid waste from Upper Arlington, Hilliards, Grandview Heights, Marble Cliff, Worthington and several private haulers. By MCQ action the landfill will close March 31, 1974, and the wastes will probably go to the Franklin County Landfill at an increased cost plus extra truck-fuel and employee man-hours.

WM&E has indicated disapproval of another MCQ quarry site. Upper Arlington's city engineer is proposing a method of sealing and tiling the suggested landfill site. OEPA personnel will meet with 12-15 concerned persons on March 6, 1974, to discuss proposals--no decision will be made at that time.

Some of the information, correctly reported, appeared in the Columbus Dispatch on March 3. It is conceivable that there will be a great deal of publicity on the matter. OEPA has previously turned down a similar quarry site for the City of Columbus.
